## Ground Works & Minor Civils

Buxton Water has experienced personnel who can successfully undertake all aspects of ground works and minor civil works. Some recent contracts include:-

- Car Park Reconstruction
- Resurfacing and Thermoplastic Line Marking
- Fuel Bund Construction
- Reinforced Concrete Slab construction & extension foundations
- Pot hole Repairs
- Cable Duct Installations
- Mains Water Replacement and Repairs
- Disabled Ramp Construction & Alterations
- Installation of Lineal Drainage Systems providing Solutions to flooding issues.
- Footpath & Kerb Reconstruction

## Health & Safety

Buxton Water are committed to providing a safe working environment for its staff, clients and the general public. We are CHAS registered & Members of the Water Jetting Association and we employ specialist Health & Safety Consultants to assist with our constant attention to Health & Safety in our workplace. We are proud of our excellent Health & Safety record and this is maintained by adopting an ongoing programme of in-house and on the job training in order to provide all staff members with a thorough and in depth knowledge of Health and Safety issues, including Health and Safety training for onsite drain repairs and sewer unblocking techniques.

Our Health & Safety Management & Consultants conduct on-site Health and Safety checks to maintain a vigorous and open attitude through all our employees towards Health and Safety.

Our Operational Managers & Supervisors are fully trained to provide Risk Assessment & Method Statements and adapt them to suit each specific site.

### Emergency Drain & Plumbing Works

We provide an Emergency call out service for dealing with all aspects of drainage and plumbing problems. Our designated Help Desk Team are available 24hours a day, 365 days a year, to deal with your request for assistance with blocked toilets, sinks, baths & showers and external drainage including gutters and downpipes. They will arrange for one of our friendly operatives to visit your site who will carry out a swift diagnosis of the problem, before undertaking the necessary works to rectify the problem.

### Planned Maintenance Schemes

Our planned maintenance schemes are designed to provide pre-planned maintenance visits for the cleaning and inspection of site drainage systems. These schemes can provide regular maintenance which limits the risk of blockages and flooding issues, both of which can have a serious impact on your business. These schemes can be arranged for Monthly, Quarterly or Annual visits to suit all sites and are particularly effective for Nursing Homes, Public Buildings, Schools, Shopping Centres, Retail Parks & Car Parks and a whole host of other large capacity sites. The amount of planned visits will be agreed at the beginning of the contract and approximately 7 days prior to the visit, our Planned Maintenance Team will contact you to arrange a suitable time & date for the works. On completion of the visit, we will email a report on the works carried out and any observations made by our operatives. These schemes are also helpful when deciding what annual building budgets should be.

### CCTv Site Drainage Inspections and Reporting

Our CCTV & Site Investigation Crews are fully trained in house to provide CCTV drainage surveys to the highest of standards in the industry. We operate a 'user friendly' style of reporting whereby our survey reports can be easily understood by a layman and not just surveyors. Our operators carry out careful and thorough inspections of underground drainage systems reporting on specific defects which may either be contributing to blockages or other drainage related problems such as foul smells, flooding issues, ground subsidence. Our Colour Drainage Surveys are produced onto DVD and drainage reports can be emailed directly from our Reporting Centre in Chorley, reducing the waiting times substantially.

### Other Services

- Pre purchase drainage surveys
- Sonar tracing
- H.P. water jetting
- Complete drain cleaning service
- Graffiti removal
- Descaling
- Pipe Lining Works
- Root removal
- Tanker jetting
- Waste disposal
- Drainage replacement, new drains, septic tank & culverts installed
- Free estimates, free advice

Typically, we may be contracted to remove resin, polymer, tar, oil calcium etc. Combinations of rigid, flexible and retractable lances facilitate the effective cleaning of tube bundles.

### Development and Training

Buxtons constantly review the developments in its areas of operation and incorporate the latest features of new technology into its own equipment.

Similarly all operatives and management undergo constant training to ensure maximum benefits within safe operating limits. Training courses attended include:-

- CSCS
- Confined Spaces
- Water Jetting Association
- Manual Handling
- NRSWA
- First Aid
